COLORED FLASH PAPER (Choice of Colors)

CHOICE OF COLORS BELOW.

A mainstay in the magician's bag of tricks. Specially treated paper that is used to create a burst of fire. Used in many effects where you need to create a flash such as vanishing a coin, producing a dove, or shooting a ball of fire. Sold to adults only, 21 yrs. or older. Requires heat source. Four 8x10" sheets. Available in Green, Red, Black, or White.

\$ 7.95

Colored Smoke Cartridges (Choice of Colors)

Easy to use; convenient to store; and affordably priced. Cartridges burn for 3 minutes. 5 per box. When ignited, the powder in these cartridges produce clouds of colored smoke with no flame. Completely non-explosive - safe for handheld devices designed specifically for its use. Our new White & Colored Smoke Cartridges provide several new options for you to execute your smoke effects:

Place the cartridge on a level non-flammable surface and light the end with a match or lighter. (Aluminum pot pie pans or glass ashtrays work great!)

Will burn under water and can be used indoors.

Our new smoke cartridges are great for stage productions, parades, concerts and sporting events and come in a handy storage case for safe-keeping.

Specifications Use caution as the cartridges/powder burns hot, and the colors will stain objects that are directly next to the stream of smoke. Use White if staining is a concern.

Flare by Alpha Magic - Trick (watch video)

View ClipEffect You're painting the town red on a late Saturday night. Under the flashing strobes of the city's trendiest nightclub, you pull a cigarette out of a classy cigarette case and call attention to it... ..wait The lines on your forehead become more visible, obvious to those who sense your intense concentration. Let them watch you as close as they can. Let them focus their attention on the cigarette as you pinch it lightly between your fingers. Time slows down as you hold still. Let them be consumed by your enigmatic presence. Slowly...gently...painstakingly the cigarette crackles and smoulders, seemingly reacting to the stares of those around you. Everyone goes silent. Your eyes are open intently. And then it happens. Like the sudden pop of the cork from a champagne bottle, the tip of the cigarette forcefully bursts into flames, consuming the entire tip with white hot fire, real fire. "It can't be!" They were looking all this while. "Impossible!" Your fingers were held apart with nothing to hide. "@#%?!!" You were holding the cigarette up in full view. All thoughts of trickery slowly ebb away as the flame subsides into a faint, steady glow. Smoke the cigarette yourself or offer it to a mesmerized albeit dumbfounded witness, leaving behind memories of nothing short of a complete, visual miracle. Call it psychokinetic combustion, call it magic. Some even call it pure devilry. We call it Flare. What is Flare? Flare is a versatile effect / concept that can be used as a cool trick at a bar, an opener or closer to a magic, mentalist, or "witchcraft" display. Flare is the final evolution of a method that has undergone several years of performance and experimentation, so you can expect the training material provided to be full of detail, leaving no stone unturned. Despite its effectiveness, you'll be pleased to know that Flare is extremely easy to perform, and virtually ANYONE can make it look like a REAL miracle. So easy that our graphics designer Alexient, who's a non-magician, was performing it for our demo video after a few minutes' practice! Here are additional points to note:

Easy to perform. Sleight-of-hand is not necessary.

No angle restrictions. Perform it surrounded.

Gimmick is completely invisible to the audience.
Use any cigarette. Filtered, unfiltered or hand-rolled, even cigars.
Does not use flash paper or matches.
No fuels or lighter fluid required.
No batteries needed.
No reels or pulls.
No ignition devices.
Uses refills that are widely and cheaply available anywhere.
Clean as a whistle. The ignited cigarette can be handed out for examination.
Your hands are completely empty (other than the cigarette) when you perform.
Instant reset. Pull out another cigarette and do it again.
What is included?

A non-flammable gimmick that is small enough to be hidden virtually anywhere.
A huge bundle of the special paper needed for this effect. Please note that this is not flash paper.
A preparation template.
Instructional DVD with clear and concise close-up footage.
What are the contents of the DVD?

Instructions on preparation and maintenance of the gimmick.
Materials, refills and where to get them.
Safety precautions.
Complete handling and subtleties.

FUSE - Spirit Fire Writing Solution

The magician has the spectator choose a ESP card and memorize the symbol (this could also be a regular playing card or anything else you wish to force on the spectator). The magician then removes a piece of tissue paper and asks the spectator to hold it between their hands. The spectator is told to focus on the paper and concentrate on the symbol. The magician now takes a match, lights it and lets it burn for a few seconds. He then blows the match out and touches it to the paper. Slowly the paper starts to burn where the match was placed and something strange starts to happen. The paper is now seen to be burning a trail of an image. After a few seconds the paper burns a the chosen image completely in to the paper. The paper may be given to the spectator as a souvenir. This is an awesome effect that has been updated by a professional chemist. He has created a solution the will burn at the same rate until it is finished and can be prepared a year ahead of time! Completely safe and easy to use. Practically no skill is required. Don't be fooled by quick to make solutions. This one works 100% of the time. Complete with instructions, solution, brush and several possible routines.

HOT TAMALE

Imagine showing a jar of hot tamale's, when you open it, both the lid and the inside of the jar burst into flame. You then reach inside and produce a burning hot tamale. This is a very funny gag that is designed for professional use. It works using a nychromium igniter and lighter fluid. It is designed for adult-professional use. It works electronically using a nine volt battery.

This flaming pickle jar is a definite improvement of anything already on the market. This jar is designed so that you can replace the batteries easily and you can actually replace the igniter in less than five minutes. There is no need to send it back to the manufacturer to repair the ignition system.

We give you enough nychromium wire and instructions to make a number of igniters. One igniter can last for months, but it is good to know that you have the capability to repair the item in a few minutes.
