

Magic-Flower Magic

Acrobatic Floating Rose

This elegant piece of stage magic is as gorgeous as it is clever. And boy, is it gorgeous!

The magician removes a beautiful, deep red rose from a vase on his table. Ah, the sweet smell of magic! He next removes a elegant scarf from around his neck.

Next, the rose is seen to cling mysteriously to the scarf! Then it floats back and forth, slowly and deliberately. Even when the magician holds the scarf by one end or moves it perpendicularly to the rose, the flower continues to cling to it!

Then, the rose floats in front of the scarf, moving about in a serene, elegant manner. Finally, the magician removes the rose from its position against the scarf, returns it to the vase, and bows to the applause this trick is bound to garner.

You are supplied with the elegant rose, and a detailed video with performance and explanation segments. Supply your own scarf.

This effect is, simply put, a stunner. Perfect for stage performers looking for a unique effect to add to their repertoires. This definitely is something you don't see every day! (f)

He lets the blood from the rose drip into the glass until the rose is totally bled out. Now the magician takes the glass of wine and drinks the rose blood (if you dare).

Comes complete with gimmicked rose and detailed instructions for performing this shocking stage illusion. Instructions explain how to create the fake blood, as well as proper handling and care for the rose.

Fantasy Silk (watch video)

This is not a new Idea but we have made several improvements on the original design. Firstly the special silk which does all the work for you is top quality and made by a top seamstress and the change in colour is so quick due to little weights sewn into the corner that falls down. Also there is a strong loop at the top corner which during the change of colour ensures that you will not lose the silk and makes the release much easier.

The flowers also are of top quality made by our special team. You walk onto the stage or platform holding a black silk by one corner you put your hand inside and produce a really beautiful bouquet of nine red flowers with white centers. Then you just stroke the black silk with the flowers and RED flowers appear all over the silk.

Once again you put your hand inside and produce another bouquet this time of white flowers with red centers.

Again you stroke the silk with the white flowers and the silk changes into a red silk with WHITE flowers

it looks FANTASTIC !!!! The bouquets measure 18 inches long and 20 inches in diameter and each has

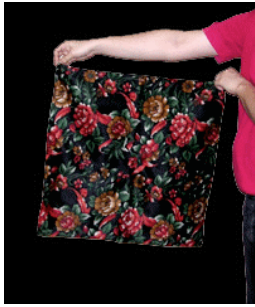

nine large flowersthey look great. Next you bunch up th silk and from inside you produce a DOVE.....this can

be a real live DOVE or if you do comedy you can produce a rubber one . It is all self contained within the silk itselfno body loads .Please note that the stems of the flowers are a little shorter than in the demo video making the bouquet appear a little smaller, but the silk and the flowers are the same size.
